CLERK-RECORDER INTRODUCES NEW COUNTY CLERK & RECORDING SYSTEM

The County Clerk-Recorder launched a new County Clerk and Recorder services system today at its downtown Martinez office. The new system includes a suite of digital applications that provide improved security, redundancy and productivity tools.

The customized system features a "google-like" search tool for locating real property records, some dating back to the 1800's, and allows residents to purchase certified copies of vital records and real property documents remotely. We are pleased to offer streamlined online services for the public's convenience and safety amid the current health crisis.

"We are excited to expand our technologies to provide these essential services to the constituents of Contra Costa", said Debi Cooper, County Clerk-Recorder, after recording the first document in the new system. "I am so proud of the staff, who worked long and hard to bring this project to fruition. This accomplishment takes on even more significance when coupled with the challenges of personal distancing and remote work due to the pandemic."

After an extensive RFP process, the County selected Granicus, Inc. (Denver, CO) to customize and implement the system. The Granicus suite of services replaces the County's 20-year old legacy system, which was no longer supported. The project is funded with dedicated Recorder Modernization funding, so no General Fund monies were used.
